We are now looking for a multi-skilled maintenance engineer to work in our busy Warehouse based in Perivale. You will be mainly responsible for the automated picking line (KNAPP), whilst also carrying out planned and corrective maintenance on machinery and the company's building.

SECONDARY RESPONSIBILITIES

- Planning and undertaking scheduled maintenance
- Responding to all breakdowns on Site
- Diagnosing faults and repairing them
- Obtaining components to carry out Fixes and Repairs
- Operating and providing efficiency improvements on machinery, involving packaging machines (Lantec machines), bending machines as well as the Warehouse Management System
- Creating Maintenance procedures and Processes
- Managing all the Control Processes including Fire Alarm Emergency lighting and Fire Exit checks
- Weekly Fire Alarms and Sprinkler systems weekly checks
- Assisting with ongoing development to machinery and continual process improvements.
- Ensure all duties are undertaken in compliance with Safety, Environmental Regulations and Company procedures.
- Housekeeping
- Ad hoc projects

ESSENTIAL EXPERIENCE, SKILLS AND ABILITIES

- Electrically biased, multi-skilled maintenance engineer
- FMCG background
- Minimum 16th Edition Electrical Wiring Regulations or 17th Edition desirable.
- Possess good mechanical skills
- Must be able to demonstrate excellent fault finding skills on electrical, pneumatic and hydraulic systems.
- Excellent communication and time management skills.
- The ability to work in a high pressure environment.
- A 'can do' attitude - able to work on own initiative.
- Adaptable to change
